

## DRAFT AGENDA

# WORKSHOP ON SUPPORTING INCLUSIVE ENTREPRENEURSHIP IN CROATIA

4 July 2018

### Background and objective of the workshop

The Organisation for Economic Co-operation and Development (OECD) and the European Commission are collaborating on a multi-year project on inclusive entrepreneurship policies and programmes. This work has produced a series of outputs to support policy makers, including *The Missing Entrepreneurs* books, a series of policy briefs, the good practice compendium *Inclusive Business Creation: Good Practice Compendium*, and country-specific policy advice. The OECD is now undertaking an information collection exercise across all European Union Member States to deepen its understanding of the different approaches taken to support under-represented and disadvantaged groups in business creation and self-employment (e.g. youth, women, seniors, migrants, the unemployed, and people with disabilities).

The purpose of the workshop is to review and discuss a report on inclusive entrepreneurship policies and programmes in Croatia. The OECD would like to ensure that the description of current policy actions is accurate, validate its preliminary policy recommendations and bolster the justification for these recommendations.

**Participants** will be key policy makers with responsibility for the design and implementation of inclusive entrepreneurship policies and programmes, as well as other key stakeholders that have a role in delivering support programmes to the target groups.
